

BALLS SANITIZING MACHINES

to decrease the infection it is recommended to

TAKE CARE OF HAND HYGIENE, clean the **EQUIPMENT** and the **ENVIRONMENT**

Sweat, saliva or blood are always present in the athletic-sports environment and consequently in every shared surface inside a gym.

The continuous touching of common surfaces is called **FOMES**, that means "the cause or source of a contagion".

A "**fomes**" **equipment** is obviously the **BALL** which is touched by several athletes in a rapid succession.

Advanced Distribution S.p.A. created **AD Saniball**, a semi-automatic system able to **ELIMINATE** this problem by disinfecting **sport balls**.

AD Saniball is simple to use and works with a **specific disinfectant liquid**. Machine is set to work with AD liquids.

- EASY TO USE AND MOVE
- QUICK DISINFECTION
4 sec x BALL
- COMPACT DIMENSIONS
180CM x 50CM x 100CM
- LOW ENERGY CONSUMPTION
220V 60W
- OPTIMIZATION OF THE LIQUID CONSUMPTION (6 NEBULIZERS)
15ML x BALL
10L TANK
MORE THAN 500 BALLS x FILL
- SIGNIFICANT DECREASE IN SANITIZING COSTS
